Displaying Your Portraits

The final product of your photo session is the creation of beautiful portraits to display in your home and to enjoy for years to come.

The best way to display portraits is to complement the images and the style of your decor. With lifestyle photography, groupings of portraits in a series make sense to tell your story rather than one single, posed image.

This display inspiration guide presents a number of customizable gallery ideas to show off your unique art.

Our studio has three options for purchasing images:

FRAMED PRINTS

Your photographs are mounted on a thick substrate and include an option for matting if you prefer. Each portrait is delivered in one of our low-profile, high-impact frames in a array of color options and widths designed to complement any decor.

CANVAS

Images are printed directly on canvas and wrapped around a custom-made stretcher frame for a clear gallery look. Featuring a white poly-cotton blend matte canvas with a water resistant finish and heav flexible weave these canvases are a clean and classic option.

METAL PRINTS

With vibrant colors and sharp detail, these high gloss metal prints transform your portraits into awe-inpsiring conversation pieces. Images are printed directly onto a sleak aluminum for a touch of contemporary elegance.

All galleries can be designed using framed prints, canvases, or metal prints depending on your preferences for the display area.
